

## Cable Termination

Home > Cable Termination

At PCA Technologies, we are making safe arrangements while doing the manufacturing of **GIS cable termination** and switchgear connections. All our manufacturing items that include RMU cable termination, switchgear cable termination, and switchgear connections come with long-haul capacity.

We make the cable termination and connection items useful to meet the future demand of our customers. Our design team is making use of good quality items while manufacturing these products.

The present reach of our company incorporates **cable terminations** and switchgear connections. We have the manufacturing techniques available with us to make the distinguishable connectors and terminations.

These items have been made with the help of the pre-formed methods to keep them in one piece. It includes key capacities like electric field control, fixing, and protection. Our clients are using around 3 million pre-linked shape joints, link terminators, and link connectors.

We have maintained an effective base of client connections. For the business work, our clients have brought GIS cable terminations, switchgear cable terminations, and RMU cable termination for their business work.

### List of Products available at PCA Technologies

**PCA Technologies** are making top-quality products for the clients. It includes cable segment products, accessories, joints, and cables. These kinds of joints of cables are available in the components from 1.1kV to 66kV.

We have a wide array of other products that include:

- GIS Separable Connectors
- Touch and Pouch proof GIS, RMU, Transformer & Switchgear connections
- Various tubing that includes heat shrinkable joints and connectors
- Other components in the product list are anti-tracking, stress control, insulating tubing, mastics, sheer bolts lugs, connectors, glands, earthling braids, line boxes, boots, and end caps.

According to the strictly laid designs and specifications, we do the manufacturing of our products. We work as per the industrial standards and our team takes these standards seriously. In all types of the domestic and international sectors, our products are widely accepted.

At PCA technologies, we have a wide range of products available. The expert teams working at PCA technologies are trying to work to give 100% satisfaction to our clients. We have increased our international sales network from the past years.

Additionally, we are continuously evolving to ensure a competitive advantage on our company's products available. Our sharp focus is on making products according to the customer needs.

### Product Quality & Services

PCA technologies being a manufacturer in making GIC cable terminators and switchgear connections.

We have control over the quality of our products right from getting the raw materials and completing the manufacturing process to make a finished product.

Call Me Back

- Reliable products are available at PCA technologies.
- Our staff is working 24/7 providing a strong technical backup.
- The team does the complete fault analysis and jointer training.
- RMU cable termination and connectors are available in our company at competitive prices.

We follow the vision to provide the best quality products to our clients at cost-friendly prices.
